

**Minimum Garage length to accommodate car on MR1 car lift (car with wheels in contact with the ramp end stops)**

With reference to the sketch below

The minimum required garage length is the greater of the car length, or  $X + \text{ramp length}$ .

**NB** The standard MR1 Classic lift has ramps 3660 mm (144 in) long, whereas the standard MR1 Modern and Heavy have ramps 4000 mm (158 in) long. However, Bespoke MR1 lifts may have longer or shorter ramps.
